---

ONE offers a custom variety of web security services to keep your website up and running and safe from harmful hackers. Every day there are new threats that can penetrate your site or take it completely down.

Data Management & Storage Data is perhaps the most overlooked asset of a business. Until it is lost, that is. At One Business Mart, we understand how important it is to keep business documents and files safe from corruption, viruses, hardware and other threats. We keep your documents and vital information offsite on our secure servers where it is completely safe, secure and accessible via the Internet. In-house backup solutions are subject to system failures, user error and are no protection against theft, fire or natural disaster. Our data backup solution, after setup, is completely automated so you don't have to think about unless you need to recover files. Recovery of files can be done quickly and is as easy as copying the files back to your computer.

Get started today, call 720-273-8746 to talk to one of our consultants.

### Benefits:

- Professional IT support
